PART 1

Read the following message.

Dear Grandpa,

Thank you so much! I was surprised and delighted to receive your parcel and open your thoughtful present. A two-person camping tent is just what I needed. I've used it already; my friend Ryan and I spent a week camping in the Kootenay region of BC. We just got back. I was going to use our old family tent, but it's not only too big, it is also getting pretty worn out, so your gift was perfect.

We planned on camping at various locations in the Kootenay region, but we ended up staying at our first campsite for the whole trip. The campground, located on the east side of Arrow Lake, was called McDonald Creek Provincial Park. We were looking forward to the white sand beach, but when we arrived, the park ranger informed us that all the recent rainfall had caused the lake to flood a couple metres higher than normal. The beach was completely submerged. We still had a great time, though, hiking in the beautiful wilderness.

We drove a different route to get home so we could pass through the city of Nelson. It looks different from the last time I was there, but that's not too surprising; I was there just a couple times as a kid. Last time we were there, Dad showed me the house where he had been born, and also your old clothing store. I drove around and I couldn't find your old house, Grandpa; however, I did find your old store! It's a cafe now, but they kept your old shop sign as a decoration in the cafe. I got pretty emotional when I saw it. I felt really proud of our family history.

Now I'm back in Calgary, but the trip to Nelson made me realize how much I miss you. So, I was thinking that maybe I should fly over to visit you. I have 2 weeks before college starts, so I could come for a week or so. I have enough money saved up from my summer job to pay for the ticket to Montreal. How does that sound? Perhaps the two of us can go camping like in the old days. We haven't done that since you moved east. I'll bring the new tent!

Love, Greg

Choose the **best** option according to the information given in the message.

1. Greg _____
- ◯ got used to his old family tent.
- ◯ got a new tent in the mail.
- ◯ needs a new tent for his trip.
- ◯ bought a new tent.

2. Greg and Ryan _____
- ◯ toured several campsites in the Kootenay region.
- ◯ enjoyed the provincial park's white sand beaches.
- ◯ were surprised by the water level at the lake.
- ◯ were unable to tour and camp because of the rainfall.

3. Greg took an alternative way back because _____
- ◯ he wanted to revisit his dad's hometown.
- ◯ his grandpa still owns a shop there.
- ◯ he wanted to pay his father a visit.
- ◯ he used to live there as a child.

4. Greg became emotional when _____
- ◯ he found out his grandpa's business had shut down.
- ◯ his father told him stories about his childhood.
- ◯ he saw the house where his father grew up.
- ◯ he saw something that belonged to his grandfather.

5. Greg is hoping to _____
- ◯ use the tent for the first time.
- ◯ travel to Montreal very soon.
- ◯ be accepted in college this year.
- ◯ get a summer job before starting school.

6. Greg's grandpa _____
- ◯ is coming to Calgary for a few weeks.
- ◯ bought Greg a ticket back to Nelson.
- ◯ used to go camping with Greg.
- ◯ is moving back to Calgary.

PART 1

Here is a response to the message. Complete the response by filling in the blanks.

Greg,

It goes without saying that I'd love to 7._____ Now with my old bones, I'm not so sure that 8._____ but even if it's not, I think we should do it anyway. After all, we have to put the tent to good use! You just email me your travel plans. Also, there's no need to 9._____I can take care of that, you should keep your savings for tuition.
Well, I can't say I've been to Nelson since I sold my business there many years ago. Did you take any photos of
10. _____ If you did, I'd love to see them. I'm sorry you 11. _____ I don't even know if it's still standing. If it is, it would be a hundred years old.
Anyway, email me as soon as you book the flight over here.

Grandpa

7. ◯ visit Montreal.
◯ visit the Kootenays.
◯ go to Calgary.
◯ see you here.

8. ◯ flying here is wise,
◯ I can make it to Calgary,
◯ we should visit the old cafe,
◯ camping is a great idea,

9. ◯ plan a camping trip for us;
◯ spend your own money on a ticket;
◯ buy a new tent for this trip;
◯ drive all the way to Montreal;

10. ◯ the old store sign?
◯ the old cafe?
◯ your father at the cafe?
◯ the house where your dad was born?

11. ◯ didn't find the old house.
◯ didn't find the old store.
◯ didn't recognize the cafe.
◯ couldn't buy the old sign.

PART 2

Read the following email message about the diagram on the left. Complete the email by filling in the blanks

Subject: Kids Activities
To: Mary S <t.smithers@frimpton.bc.ca>
From: Sandy Rockton <srockton@sterlings.ca>

Hi Mary,

It was a pleasure meeting you and the kids at the park on Sunday. I hope you're settling into our neighborhood. You said you were looking for 1. _____ I saw a few possibilities in the latest Burnaby Parks and Recreation brochure. I remember you saying that Alex is contemplative 2. _____ seems a great choice for thinkers like Alex. He will get to think hard and learn some additional math skills. You said Melissa is quite scared of math, in which case you could check out 3. _____ They may help her feel better about her schoolwork.

Speaking of Melissa, she may want to join my daughter Cindy in the young teens' soccer league. This is quite a commitment as there is 4. _____If that's a problem, she could try karate. I'm not sure about the class times 5. _____ You'll have to call and ask.

Cheers,
Sandy

1. ◯ some after school activities for your kids.
   ◯ some helpful educational websites.
   ◯ babysitting services for your children.
   ◯ online classes for your son.

2. ◯ Trimble Studio
   ◯ hellomath.ca
   ◯ A1 Math and Chess
   ◯ Eastburn Soccer

3. ◯ Eastburn Soccer.
   ◯ Trimble Studio.
   ◯ Karate.
   ◯ the hellomath.ca website.

4. ◯ a boys and girls soccer league.
   ◯ training in the week and a weekend game.
   ◯ a website where you can get information.
   ◯ a week long summer training session.

5. ◯ there's no website.
   ◯ they are not well established.
   ◯ there's no contact information.
   ◯ I don't know where they practice.

Conteúdo licenciado para Arezoo -

PART 2

Choose the best option.

6. Mary and Sandy _____

- ◯ have been friends for a long time.
- ◯ met at their kids' soccer practice.
- ◯ now live in the same area.
- ◯ were neighbours in the past.

7. Sandy _____

- ◯ is looking for activities for her own children.
- ◯ is suggesting activities in the neighbourhood.
- ◯ works for Burnaby Parks and Recreation.
- ◯ has committed to drive the girls to soccer practice.

8. Melissa _____

- ◯ cprefers individual to team activities.
- ◯ doesn't have the weekends off.
- ◯ doesn't enjoy math as much as Alex.
- ◯ is too young to play team sports.

PART 3

Read the following passage.

A. The first record of chewing gum dates back to Finland about 5,000 years ago. Neolithic-period chewing gum was made of bark tar and was widely utilized for its antiseptic and medicinal properties. In America, chewing gum was first introduced to settlers by the American Indians who chewed resin made from the sap of spruce trees. After World War II chewing gum was made of a latex sap substance called chicle, which has been steadily engineered and replaced by synthetic rubbers and artificial sweeteners that allow for greater flavouring, colouring, and texture. Modern chewing gum hardly resembles its predecessors in appearance and flavour. It has also gained unprecedented popularity, becoming a 20-billion-dollar industry in North America.

B. Over the past decades, the bad reputation chewing gum earned for causing cavities and gum disease has also begun to dwindle. With the advent of sugarless chewing gum, most dentists today deem chewing gum in moderation to be harmless, or even potentially beneficial to oral hygiene. In addition, functional chewing gum, a special category of gum that imparts a practical function in addition to, or as a replacement for, the usual enjoyment provided by a confectionery gum, has become increasingly prescribed by dentists and doctors alike. Conditions such as bad breath and tobacco addictions are now commonly treated with functional gum. Surgeons also prescribe functional chewing gum for patients recovering from gastrointestinal surgeries.

C. Recent research suggests the benefits of gum may not be limited to medicated gum. Chewing regular gum has been found to boost cognitive performance in many ways including improved reaction time, motor control, and alertness. These effects have been found to come at an expense, however. Although as many as eight areas of the brain are activated by the simple act of chewing gum, the cognitive gains of mastication-induced arousal can only be sustained for a short period. Moreover, chewing gum was observed to interfere with verbal-fluency and short-memory tasks.

D. Oral health researchers posit the short-lived cognitive gains of chewing gum pale in comparison to their potentially hazardous health effects. They claim the innocuousness of sugarless gum is a myth, expounding that sugar substitutes such as aspartame have been increasingly linked to different types of cancer and autoimmune diseases. They also point to possible chronic irreversible conditions that may ensue from excessive gum chewing such as headaches, tightness in jaw muscles and nerves, metabolic imbalances, and irregularities in mastication that range from tooth decay to bone loss.

E. Not given in any of the above paragraphs.

Decide which paragraph, A to D, has the information given in each statement below.

Select E if the information is not given in any of the paragraphs.

1. Evidence suggests gum chewing can enhance some brain functions.

○ A ○ B ○ C ○ D ○ E

2. The chemical bases of chewing gum have been reformulated.

○ A ○ B ○ C ○ D ○ E

3. Chewing gum is used post-operatively as a healing aid.

○ A ○ B ○ C ○ D ○ E

4. There can be lifelong damage associated with regular intake of synthetic sugars.

○ A ○ B ○ C ○ D ○ E

5. Chewing gum can curb some unhealthy dependence behaviours.

○ A ○ B ○ C ○ D ○ E

6. Some researchers oppose the reported benefits of chewing gum.

○ A ○ B ○ C ○ D ○ E

7. Patients who chew gum regularly tend to be more neglectful of their oral hygiene.

○ A ○ B ○ C ○ D ○ E

8. Early chewing gum was entirely natural.

○ A ○ B ○ C ○ D ○ E

9 The benefits of sugar-free gum are recognized.

○ A ○ B ○ C ○ D ○ E

PART 4

Read the following article from a website.

Stephanie Lee is a science teacher at Ryerson Secondary who believes that real science should encourage critical thinking, even if it means challenging what's written in the textbook. Part of the curriculum involves learning about climate change, and Lee was dismayed to find the textbook material to be "little more than propaganda, which claims that global warming is chiefly a human-caused phenomenon."

Lee argues that education is supposed to teach students how to see objectively, yet textbooks often monopolize certain viewpoints and push them as the only truth. In the case of climate change, Lee was appalled to find that no alternative theories were presented. "The absence of other perspectives seems to indicate that the topic of global warming has been made into a sort of doctrine which seeks to diminish the credibility of other points of view," Lee says. Lee taught her students additional perspectives. Not only did she teach the theory of anthropogenic global warming, that is, that global warming is caused by human consumption of fossil fuels and the release of carbon dioxide into the atmosphere, but also taught that throughout history, the earth's temperature has naturally risen and fallen.

Other science teachers at Lee's school have raised concerns that Lee's approach is only confusing students. Carol Harvey argues that the greenhouse gas effect and subsequent global warming is not a controversy in the scientific community. It has been proven that humans have increased the amount of greenhouse gases in the atmosphere by roughly 30% in the last 100 years. "Our textbooks are up to date, and Lee is only prompting students to dismiss valuable textbook information," Harvey says.

Lee disagrees, asserting that science should not shy away from evaluating multiple perspectives. "Carbon dioxide changes have not been proven to be the primary cause of global warming," Lee says. "In fact, research indicates the reverse might be happening: global warming might be causing changes in carbon dioxide levels. Either way, my job is to help students to analyze both theories, not simply accept the one presented in the textbook."

Choose the **best** option according to the information given on the website.

1. Stephanie Lee's main objective in teaching science is to _____

- ◯ make sure students have mastered the textbook content.
- ◯ teach about the impact of human activities in global warming.
- ◯ challenge well established educational publications.
- ◯ promote reflection on different scientific perspectives.

2. According to Lee, the main issue with textbooks is that _____

- ◯ they reflect research sponsored by private businesses.
- ◯ they typically present information from particular vantage points.
- ◯ they promote low-standard research with no scientific credibility.
- ◯ they contest less-popular theories about global warming.

3. Lee's opinion on climate change differs from science textbooks in that _____

- ◯ she agrees it is actually a chiefly human-caused phenomenon.
- ◯ she argues that fossil fuel consumption is mostly to blame.
- ◯ she observes that historically the earth's temperature has fluctuated.
- ◯ she demonstrates that the temperature around the world has mainly dropped.

4. The main criticism of Lee's teaching approach is that _____

- ◯ it ignores controversy in the scientific community.
- ◯ it could be misleading for some students.
- ◯ it ignores the views presented in the textbook.
- ◯ it lacks a historical perspective.

5. Lee responds to criticism of her teaching approach by _____

- ◯ arguing multiple perspectives ought to be part of learning science.
- ◯ reiterating that global warming is yet to be scientifically confirmed.
- ◯ questioning her colleagues' scientific knowledge.
- ◯ highlighting how well her students have accepted her approach.

PART 4

The following is a comment by a visitor to the website page. Complete the comment by choosing the best option to fill in each blank.

Lee is right that schools 6. _____ The trouble is how we decide which points of view we teach and who decides. On the one hand, as Lee notes, 7. _____ On the other hand, are teachers any better at presenting an unbiased perspective? 8. _____ upon which Lee seems to focus is very complex. The scientists themselves have yet to make up their minds and yet Lee believes that science teachers are qualified to 9. _____

This is a complicated problem. In the end, however, I tend to side with Lee. Teachers 10. _____ on a topic and allow students to draw their own conclusions.

M. Ladner

6. ◯ should not hire underqualified science teachers.
   ◯ should not have a fixed science curriculum.
   ◯ should teach multiple perspectives on a subject.
   ◯ should teach children about the politics of research.

7. ◯ we cannot rely on textbooks to provide a balanced view.
   ◯ teachers are unwilling to supplement the content of their classes.
   ◯ part of the school day should be spent investigating research articles.
   ◯ students have assumed a rather passive interest in scientific research.

8. ◯ The responsibility of science teachers
   ◯ The question of changing the school's curriculum
   ◯ The value of reading original research in class
   ◯ The issue of climate change and global warming

9. ◯ create tests that measure scientific knowledge.
   ◯ dictate how researchers should carry out their investigations.
   ◯ make choices about which theories should be taught.
   ◯ teach students about the impact of global warming.

10. ◯ should present diverse positions
    ◯ stop using the textbook
    ◯ focus on environmental problems
    ◯ hire better-prepared teachers

Answer Key

PART 1	
Question 1	got a new tent in the mail.
Question 2	were surprised by the water level at the lake.
Question 3	he wanted to revisit his dad's hometown.
Question 4	he saw something that belonged to his grandfather.
Question 5	travel to Montreal very soon.
Question 6	used to go camping with Greg.
Question 7	see you here.
Question 8	camping is a great idea,
Question 9	spend your own money on a ticket;
Question 10	the old store sign?
Question 11	didn't find the old house.

PART 2	
Question 1	some after school activities for your kids.
Question 2	A1 Math and Chess
Question 3	the hellomath.ca website.
Question 4	training in the week and a weekend game.
Question 5	there's no website.
Question 6	now live in the same area.
Question 7	is suggesting activities in the neighbourhood.
Question 8	doesn't enjoy math as much as Alex.

PART 3	
Question 1	C
Question 2	A
Question 3	B
Question 4	D
Question 5	B
Question 6	D
Question 7	E
Question 8	A
Question 9	B

PART 4	
Question 1	promote reflection on different scientific perspectives.
Question 2	they typically present information from particular vantage points.
Question 3	she observes that historically the earth's temperature has fluctuated.
Question 4	it could be misleading for some students.
Question 5	arguing multiple perspectives ought to be part of learning science.
Question 6	should teach multiple perspectives on a subject.
Question 7	we cannot rely on textbooks to provide a balanced view.
Question 8	The issue of climate change and global warming
Question 9	make choices about which theories should be taught.
Question 10	should present diverse positions
